It also has the same 5 levels of the previous version (today Data Mining 4 is represented in 5 apps and Data Mining 5 is represented in 1 app), plus a new exit mode, that is, giving the player the possibility to exit the closed circle and be transferred to the next one. A nice touch is that after playing for a while the player can earn achievements for reaching a certain percentage of completion (the difficulty starts at 50% and goes up to 400%). This game is an adaptation of Data Mining 4 by the Italian studio Retrevo.
