Efficacy and Safety of the Ampule Formula of *Cordyceps Sinensis* in Patients With Advanced Prostatic Cancer: An Interim Analysis of Two Randomized Controlled Trials. To examine the effect of cordyceps sinensis on uroflowmetry (UFM), quality of life (QOL), and Likert scores for pain and dysuria in patients with advanced prostate cancer (PC). Two randomized controlled trials of 18-week double blind trial were conducted in patients with advanced PC. They were randomized to one of three groups (observation, cordyceps or placebo) in a 1:1:1 ratio. The baseline, treatment, and end point measurements included: UFM, QOL, and Likert scores for pain and dysuria. The median symptom scores were compared by the Mann-Whitney U test. The median baseline values were not different between the three groups. In the cordyceps group, the median change in UFM, Likert scores, and QOL were significantly greater ($P = .043, .001, \text{ and } .049$, respectively) than in the placebo group after 18 weeks of treatment. The median change in UFM was significantly greater in the cordyceps than in the observation ($P = .034$) or placebo ($P = .031$) groups. All three groups showed no difference in pain and dysuria. Legends of Callasia's gameplay is an interesting mix of board game and classic RPG/card game mechanics. The game focuses on the fast-paced battling that comes from playing a classic RPG, while the board game mechanics let you customize your deck and strategy. This makes the gameplay both dynamic and strategic. Your strategy can change quite quickly, allowing you to react to your opponent's actions and battle in various ways. Just like in a board game, you will be playing to the end of the match, and even into the next game, in order to earn the best victory points and survive to continue in the game. The RPG mechanics lend themselves to the game's constant pace, making it quite rewarding to keep fighting for victory. Battle Resolution Legends of Callasia lets you play up to four characters in a battle, each with their own special ability. When your characters

make an attack, you will need to target an enemy character on the board. Your ability will determine if you can target an opponent or not. For example, if your character is an archer, you can target an opponent's general on the battlefield, while a mage can only target an opponent's wizard or wizard level character. When you are out of the battle, you will be able to travel around the map and sell items to other players. Of course, you will earn additional XP while traveling around, which will allow you to level-up your character and acquire new skills, spells, or runes that will help you to become stronger. You will also find an item called an "Ornament" that will help you earn more resources and aid you in your quest to unlock more of the mysteries of the world. Other Items On your journey you will encounter many different types of artifacts and treasures, both purchased and randomly found by searching around the map. With these items, you can level-up your character's skill trees and make their attacks stronger. Each skill tree has several different runes that you can purchase from the item shop that can alter the types of attacks your character will make. You will also find scrolls that can be used to increase your movement speed, adding to your mobility around the map. On the right side of the battle board, you will find your item and storage pouches that will hold items that you have not yet acquired. The pouches will usually drop from battles, while items in storage will be automatically placed in your pouches when you level-up. There are four available item bags, each with varying

The story closely follows events in The Histories of Sun Tzu, the fourth-century historian and military theorist commonly known by the Latin name Sun-Tzu. Despite its similarity to The Legend of Zelda, the game is not a Zelda clone. Instead, it borrows elements from a number of fantasy novels, but no two tales are ever told in parallel with each other; events told in one tale have nothing to do with events in any other tale. Background In the year 1315 A.C., an old general named Li Ching goes to visit his former friend Wang Yi, the Emperor of the Kingdom of

Callasia. Here he is immediately aided by a friendly young woman called The Gun (whose identity he eventually finds out). She explains that someone betrayed the general and his friend Lord Wang. As a reward for the betrayed general's services, the Emperor grants his friend the gift of immortality and reveals that he has three daughters named Sky, Wind and Water and that their names shall now be used as the names of three islands. However, General Li is chased by the "First Dragon," a powerful pawn of Emperor Qin Shi Huang. Despite his formidable appearance and presence, he proclaims he is only a servant of a superior foe who, unknown to the general, is the true emperor. To escape, Li Ching takes the Gun to the realm of the "Second Dragon", who reveals himself to be an immortal twin brother of the Emperor. Liu Dong, the male twin of the Emperor, became a monk after meeting the first emperor, who so hated the sight of men that he banished them from the palace and claimed to be the sole ruler. Liu Dong begged for his brother to remain as ruler and plans revenge on the Emperor for his banishment. As a token of appreciation, his brother ascended him to Emperor and
